EDUCATION

THE UNIVERSITY OF TEXAS AT DALLAS (UTD) Dallas, TX
Master of Science in Computer Science (GPA: 3.81/4) with specialization in Data Science. 2019 - 2021
Coursework: Design & Analysis of Algorithm, Machine Learning, Database Design, Big Data Systems.

UNIVERSITY OF MUMBAI Mumbai, India
B.E. (Hons.) in Computer Science (GPA: 8.8/10) 2015 - 2019

SKILLS

- Programming Languages: Python, Java.
- Web Development: HTML5, CSS3, JavaScript (ES6), React.js, React Native, Node.js, SASS, AJAX, Django, REST, jQuery.
- Cloud Computing & Big Data Technologies: Apache Hadoop, Kafka, ZooKeeper, Kibana, ElasticSearch, Microsoft Azure.
- Databases: MySQL, SQLite.
- Tools & Libraries: Nightwatch.js, Pytest, Locust, Selenium Webdriver, Git, unittest, Jenkins, JUnit, JMeter, Jest, Postman, JIRA, Cypress, Rally

EXPERIENCE

CVS HEALTH INC. Dallas, TX
Sr Software Engineer May 2023 - Present
Skills/Technologies: Python, MySQL, StarRocks, Microsoft Azure, Airflow, GraphQL
- Developed & implemented 10+ features & microservices for **EOS** an underwriting tool using Python & MySQL.
- Devised data pipelines to capture data from the Data Warehouse & load into MySQL tables using Airflow & Azure Data Factory.
- Worked in a collaborative environment with PMs, QAs & other developers, contributing to Agile SCRUM ceremonies.

HYPERTHERM INC. Lebanon, NH
Software Engineer April 2023 - May 2023
Skills/Technologies: Python, JavaScript
- Developed & implemented backend microservices & automated tests for Phoenix application using Python & JavaScript.

TIKTOK INC. Mountain View, CA
Software Development Engineer in Test October 2021 - January 2023
Skills/Technologies: Python, Cypress, TypeScript, JavaScript, Git, CI/CD, JIRA, Other Internal tools
- **Lead SDET for Creator Growth - Analytics.** Improved backend tools & infrastructure used for quality analysis.
- Devised test plans & test cases for **20+ features** within **Creator Management & Monetization** value chain.
- Automated multiple backend APIs & Improved code coverage from **0 to 40%.**
- Implemented **API, UI & Mobile automation** using Pytest, PagePass & Shoots respectively.
- Integrated **API, UI & Mobile automation** scripts with CI/CD pipelines **(using ByteCycle)** & reduced latency to **1600 ms** for efficient release process & reporting **(using Tesla)**.
- Migrated Test data from the code repository to an **Internal Data Management tool called Nebula.**
- Actively involved in **Incident Management process, from troubleshooting, escalation, postmortem reporting & documentation with root cause analysis.**
- Collaborated with cross-functional teams on various projects within the **Creator** value chain.

CISCO SYSTEMS INC. Herndon, VA
Software Engineer July 2021 - September 2021
Skills/Technologies Used: Scala, Java, Scala test, Jenkins, Gitlab, Git, Postman
- Worked within **Cisco (Webex) Contact Center - Flow Control Design Team.**
- Refactored backend APIs for token authentication & authorization using Scala.
- Implemented unit tests & functional tests using Scala Test.
- Actively participated in the deployment process & cross-functional collaboration with other teams.

VISA INC. Foster City, CA
Sr. Software Engineering Intern May 2020 - August 2020
Skills/Technologies Used: Django, Python, JavaScript
- Deployed a **Web Application** for **Small Merchants,** which can increase **Merchant User base** for Visa by **75,000** using **Python.**
- Tweaked VISA's current rewards & loyalty programs by implementing the mechanism of **Karma Points.**
- Observed **Agile Process** by incorporating **Frameworks** like **SCRUM**; reducing **Project Completion Time** by **30%.**
- Designed **Front-end & Back-end** for the application using **HTML5, CSS3, JavaScript(ES6), jQuery, Bootstrap, Django & SQLite.**
- Tested code with **End to End** and **Unit testing** using **Nightwatch.js.** & **Unit-test** & achieved **Unit Test coverage of 60%.**
